

# Making Glyphs

Use the following steps to make a paper plate glyph of yourself.

1. On your paper plate, draw a circle for your face and two eyes. Make an iris in each eye and color it the color of your eyes.
2. On the rim of the plate, draw hair the color of your hair.
3. Draw your nose on the plate. If you have freckles, draw some on your face. If you do not, do not draw any.
4. If you wear glasses, draw some around your eyes. If you do not, do not draw any.
5. If you brought your lunch today, draw your mouth in a smile. If you did not, draw your mouth like a zero.
6. Now add eyebrows to your face. If you have any pets, draw them straight across. If you do not have any pets, draw your eyebrows curved.
